

HCL current tracking /temperature monitoring devices

- Currently 2 x devices contained in deliveries:
 - Econolog datalogger used to identify whether a transit breach may have occurred (needs to be connected to computer to download temperature reports)
 - Google Scout logger for remote tracking/temperature monitoring (temperature reports can be downloaded immediately from cloud)
- Positioned on top of vaccine packs in shipper box
- Temperature indicators on the Econolog datalogger (device comes in different colours)
 - Green light means temperature in range
 - Red light means breach may have occurred
- If red light flashing vaccines quarantined & NIP Logistics contacted
- Both devices are returned to courier in shipper box

HCL standardisation to Google tracking/temperature monitoring device

- Deliveries **31 May 2023** onwards will only contain Google Scout loggers
- Same positioning as current devices on top of vaccine packs in shipper box
- Google Scout logger light indicator on top section of device
 - **No light** means temperature in range
 - **Red light** means breach may have occurred
- Indicator legend for battery charging on side of device is for HCL use only
- If red light is displayed, quarantine vaccines and call NIP Logistics
- Device is left in shipper box for courier to return to warehouse as usual
